Portfolio gallery (thumbnails & captions)					X
Portfolio reflections/description pages					X
Contact page					X
Reflections (description of portfolio pieces)					
Content of reflections appropriate					X
Project images are high quality					X
Spelling and grammar are correct					X

What was your overall first impression of the website?

It was very pleasing to the eyes and easy to navigate.

Did you have any technical difficulties as you navigated through the pages and displayed the projects? None were apparent.

What do you feel are the most effective design elements of this web portfolio? The "See More" option under the /portfolio page. Being able to give a brief description of the project as well as skills/tech that was used is great for showing growth

What would you suggest be changed with the design or content of this web portfolio? I would change the "Take a look" button on the preview of websites on the /portfolio page. Since this redirects you to an existing production website, it naturally does not have a back button to the portfolio page. It should be revised to when the button is pressed, it opens the site redirect in a new tab. Another thing that I would implement would be on the /about page. This is more personal preference but I would like to see the "Skills and Tools" icons be links to their respective documentation. This gives recruiters who are not necessarily tech focused some "wow points" for your skills.

Name of Person Providing Critique: Anthony Sherman

Position/Company: Network Technician, employed by Weber State University
